Covert/Pocket Model Deployment Methods

Recommended carrying the Covert/Pocket Model to access by support hand/side of the body if possible.

While the regular belt pouch deployment method may work for the covert model, different design in pockets or different garment pockets (e.g. sports jacket pocket or cargo pockets) may necessitate a slightly modified deployment method.

Grasping the covert pocket carrier, from the pocket with support hand:

Grabbing the "grab handle" with thumb and index finger or other digits:

Use arm motion as if deploying an expandable baton and the weight of the carry case will deploy/open the banner:

Don banner by place elbow through the "loop" of material and placing over head onto primary/strong side shoulder:

Straighten banner as needed:
